To whom it may concern,

It has been a pleasure to work with Trulane over the years. Their expertise, assistance, knowledge of construction, and project oversight has been invaluable to Seacoast Church.

The first project they built for us was a major expansion of our sanctuary from 550 seats to over 1350 in 1998/99. It entailed doubling the size of the sanctuary itself, adding a foyer area, classroom space, support areas, backstage areas, revamping HVAC systems, and related site work. All of this work was accomplished while occupying the facility and were only out of the building for one weekend service. This took a tremendous amount of design work, oversight, coordination, and expertise to accommodate and they did it flawlessly. The onsite supervision was very much a team approach with assistance from David Lewis, to the project manager, and site superintendent. This project came in on time and on budget which Trulane has done in every project they have undertaken for the church.

Trulane has also done a tenant upfit for an offsite building for the church of approximately 5,000 sq. feet. The building was a shell which they worked to transform into a space which allowed us to expand our worship experience and to assist to meet the religions needs of our ever growing congregation.

They have also handled the upfit and construction of the church offices which total roughly 15,000 sq. feet. These projects included the construction of a connection between two existing buildings as well as the total upfit of the space for our church offices. Their ability to coordinate subcontractors and work with deadlines proved invaluable to the church.

I would, and have, highly recommend Trulane to other churches and businesses throughout the years we have been associated. Their integrity, expertise, and knowledge have proven they can handle the job.

If you have questions, please do not hesitate to contact me.

Have a blessed week.
